NoCrastination

Zhuoxi Chen, Julian Luan, Susie Oh, Noor Bouholaigah, Muhammad Omer

The Issue

Overall Productivity — **6.55/10**

Overall Scheduling Abilities — **6.5/10**

10.4% of Participants attributed their procrastination issues to a lack of time management skills, with **48%** of people attributing it to a lack of motivation and **28%** to mental exhaustion.

The Issue

45% of Responses found self-employed strategies effective.

Only **6** responses (**9.4%**) answered that they rarely face distractions and **1** response (**1.5%**) answered that they never do.

NoCrastination
15m ago
It's the middle of the day — a perfect time to pause, reset, and realign with your goals.

Limitation

"While NoCrastination is powerful, it's not perfect yet."

Automation Bias

Dependency Effect

Habituation
